PROFESSIONAL PROFILE

IT Help Desk & Technical Support Specialist with **8 years of hands-on experience** supporting desktop computers, laptops, Windows systems, software, networks, peripherals, and end users. Experienced across the complete support process—from computer preparation and Windows installation to software configuration, hardware/software troubleshooting, maintenance, networking, and remote assistance. Also experienced as an **OBS Studio Master/Operator** supporting computer-based live production environments. Additional technical capabilities include WordPress, web technologies, Microsoft Office, graphic design, photo editing, video editing, and motion graphics.

webcam setup, and full installation, cabling, maintenance, and repair of CCTV security camera surveillance systems.

PROFESSIONAL EXPERIENCE IT HELP DESK / IT SUPPORT SPECIALIST

8 Years of Professional Experience

Provide hands-on technical support for desktop and laptop computers, Windows systems, software, peripherals, and users. Prepare systems, diagnose problems, resolve technical issues, maintain equipment, support networks, and assist users remotely.

- Prepare, configure, maintain, troubleshoot, and repair desktop and laptop computers.
- Install and configure Windows operating systems, drivers, applications, and required software.
- Diagnose and resolve hardware, software, and operating-system problems.
- Perform computer maintenance and restore systems experiencing technical problems.
- Support and troubleshoot Local Area Network (LAN) and Wide Area Network (WAN) environments.
- Provide remote technical assistance for computer and software problems.
- Assist users with day-to-day technical issues and provide clear, practical solutions.

OBS STUDIO MASTER / OPERATOR

Operate and manage OBS Studio as an OBS Master/Operator for computer-based live production, with responsibility for preparing the technical environment and keeping live operations stable.

- Prepare the computer and technical environment for live production.
- Configure OBS scenes, sources, and audio/video inputs.
- Monitor live audio and video output.
- Troubleshoot technical problems during live operations.
- Maintain reliable operation of the live production environment.
